SHOWSTOPPING LOOKS
FOR THE BIG DAY

ARM PARTY

Invite your bridesmaids to add a little luxe to their looks by gifting them bracelets from Boston jeweler **April Soderstrom** (aprilsoderstrom.com).

The newly launched Stardust style features three gorgeous gemstone options: transformational labradorite, iridescent sunstone and milky moonstone. The gemstones are accented with microfaceted drop pendants and stardust beads. "This style is perfect for a more boho bridal party or a bit of an arm party look, which is superstylish," says Soderstrom. —SM

Soderstrom's charming baubles are made to be mixed, matched and stacked.

Registry Rules to Live By

Weston Table (westontable.com) founder Dianne O'Connor gives her top registry tips.

By Erica Corsano

1. "Choose heirloom quality and you will only need to choose once."
2. "Put something on your registry for your husband. This makes the registry special and encourages the groom to be engaged in this process."
3. "Register for something extraordinary. We all have that wonderful relative who has adored us since birth or a group of friends who want to give us something we will cherish forever and always—maybe they will go for your splurge!"
5. "Choose items with intention, meaning and heart—items that will help you create the backdrop of your life."
6. "Value the experience—choose the registry together and your couple style will shine."
